EDITOR'S NOTES

This first part of the twenty-five year index is included as a supplement of volume twenty-six.

Volumes I through VII are no longer in print and volumes IX and X are incomplete. If there is sufficient demand these will be reprinted. Some other issues are in short supply and orders will be filled as received.

An order form is included as the last page of this issue.

INDEXER'S NOTES

Included in this index are the first twenty-five volumes of THE OHIO RECORDS AND PIONEER FAMILIES. There are four issues in every volume. Roman numberals designate volume number. Arabic numerals designate page number. Example: Ackermann XXIII:122 is Volume 23:page 122.

Using the Subject Index By Volume in Conjuction with the Surname Index will save alot of time. After finding a surname in the Surname Index, check the Subject Index to find out which issue of the volume your surname will be found. Also, you'll be able to tell what subject or county your surname will be listed in conjunction with. Example: Ackermann XXIII:122 (Surname Index) can be found under Volume XXIII, Number 3, 1982, Page 122, Clark County Naturalization Records (Subject Index). Remember there are four issues to each volume or 100 issues all together. This simple procedure can save time.

In Volume II there is a page between pages 12 and 13. 12* is used in the Surname Index to designate that page.

In Volume XII there are two pages numbered 164 There is one in Issue 3 and one in Issue 4. #3-164 and #4-164 are used to tell the two apart.

In many issues there are a few pages at the front and back that are not numbered. A number in ( ) is used to designate which issue the surname can be found. Example: Adams XVII:(2). Adams can be found in the second issue of Volume 17 on an unnumbered page.

All efforts have been made to prevent mistakes, however, there probably are many. If one is found, please let us know so that the correction can be made. While working on the index, it became apparent that some middle names may have been put in the original indexes as surnames. Without the original documents to verify these names one way or the other, they were, for the most part, left in. Be careful.

Six years have been spent on compiling, checking and rechecking this index. I hope this index helps each and every one of you in your search for you Ohio ancestors.

My thanks to Dr. William Houston for giving me the opportunity to undertake the project and the Mary Jane Henney and Anne Dallas Budd for giving me the courage to begin indexing THE OHIO RECORDS AND PIONEER FAMILIES eight years ago.

I dedicate this work in loving memory of Esther Wygandt Powell. If it wasn't for her love of Ohio's records there would be no OHIO RECORDS AND PIONEER FAMILIES or an index for it.

Susan Dunlap Lee

Volume I, Number 1, 1960
1 Introduction
2 Ohio
3 Ohio Counties & County Seats
5 Northwest Territory-Petitions to Congress 1798-1799

Ohio source materials including cemetery records for publication in this periodical should be sent with permission to publish to William R.M. Houston, 454 Park Avenue West, Mansfield, Ohio 44906.

INDEXER'S NOTES

The following is the second part of a five part index for THE OHIO RECORDS AND PIONEER FAMILIES, Volumes I - 25. Having now completed typing the entire index, 38,000 + surnames have been included. The majority of names have multiple entries.

To use the index, the following suggestions are beneficial:

There are twenty-five years of volumes with four issues in each volume. To locate a surname in a volume, it is easier to find the name by using the Surname Index in conjunction with the Subject Index that appeared in the first part of the index. In the Surname Index, Roman Numerals are used to indicate volume number and Arabic Numerals are used to indicate page numbers. However, there is no designation for issue number. By checking the Subject Index, you'll find which issue, as well as, what the subject matter is concerning the surname.

In Volume II, there is an unnumbered page after page 12. 12* is used to designate that page. In Volume XII, there are two pages numbered 164. One appears in issue three and one appears in issue four. #3-164 and #4-164 are used to tell them apart. In many of the volumes there are unnumbered pages at the beginning and end of each issue. A number in ( ) indicates which issue to check for a surname that appears on an unnumbered page.

Be sure to check all possible spellings. In some cases there are many. Much of the material contained in ORPF is original court records, etc., and often, names were spelled as they sounded or hard to transcribe and mistakes were made.

Be very careful about some "surnames". They may actually be middle names or visa versa. Much time was spent working on this problem while indexing, however, in some cases, was impossible to tell without the original materials.

In using ORPF, watch out for possible mistakes in typing. Some were found while indexing. Example: Amith / Smith. In some cases, the error was evident and the surname appears in the index under the correct spelling. However, when not evident, it will appear as it does in the material. Be sure to watch for these.

All efforts were made to avoid mistakes in indexing, but, no doubt, some have been made. If one is found, please let OGS know, so that the mistake can be corrected.

Susan Dunlap Lee,
ORPF Indexer

INDEXER'S NOTES

The following is the third part of a five part index for THE OHIO RECORDS AND PIONEER FAMILIES, Volumes I - 25. Roman Numerals are used to indicate volume numbers and Arabic Numerals are used to indicate page number. In Volume II, there is an unnumbered page after page 12. 12* is used to designate that page. In Volume XII, there are two pages numbered 164. One appears in issue three and one appears in issue four. #3-164 and #4-164 are used to tell them apart. In many of the volumes there are unnumbered pages at the beginning and end of each issue. A number in ( ) indicates which issue to check for a surname that appears on an unnumbered page.

Susan Dunlap Lee,
ORPF Indexer

INDEXER'S NOTES

The following is the fourth part of a five part index for THE OHIO RECORDS AND PIONEER FAMILIES, Volumes I - 25. Having now completed typing the entire index, 38,000 + surnames have been included. The majority of names have multiple entries.

To use the index, the following suggestions are beneficial:

There are twenty-five years of volumes, four issues in each volume. To locate a surname in a volume, it is easier to find the name by using the Surname Index in conjunction with the Subject Index that appeared in the first part of the index. In the Surname Index, Roman Numerals are used to indicate volume number and Arabic Numerals are used to indicate page numbers. However, there is no designation for issue numbers. By checking the Subject Index, you'll find out which issue, as well as, what the subject matter is concerning the surname.

In Volume II, there is an unnumbered page after page 12. 12* is used to designate that page.
In Volume XII, there are two pages numbered 164. One appears in issue three and one appears in issue four. #3-164 and #4-164 are used to tell them apart. In many of the volumes there are unnumbered pages at the beginning and end of each issue. A number in ( ) indicated which issue to check for a surname that appears on an unnumbered page.

Be sure to check all possible spellings. In some cases there are many. Much of the material contained in ORPF were original court records, etc., and often names were spelled as they sounded or hard to transcribe and mistakes were made.

Be very careful about some "surnames". They may actually be middle names or visa versa. Much time was spent concerning this problem, but, in some cases, was impossible to tell without original materials.

In using ORPF, watch out for mistakes in typing. Some were found while indexing. Example: Amith/Smith.

All efforts were made to avoid mistakes in indexing, but, no doubt, some have been made. If you do find one, please let OGS know, so the mistake can be corrected.

Susan Dunlap Lee,
ORPF Indexer

Roman Numerals designate volume number. Arabic Numerals designate page number. In Volume II, there is an unnumbered page after page 12, 12* is used to designate that page. In Volume XII, there are two pages numbered 164, one in Issue Three and one in Issue Four. #3-164 and #4-164 are used to tell them apart. In many volumes there are unnumbered pages at the beginning and end of each issue. A number in ( ) indicates which issue to check for a surname that appears on an unnumbered page.
